

CEMENTITIOUS WATERPROOFING

Advanced Coatings for the Protection of Reinforced Concrete Structures

W. R. MEADOWS' line of cementitious crystalline and polymer-modified coatings are designed to protect reinforced concrete structures against chemical attack and/or water infiltration.

The **CEM-KOTE** line of products are easy to apply, permeable, and come in formulations approved for use in potable water applications. Products are available in multiple formulations for positive- and negative-side waterproofing applications.

Design for use in:

- Water Treatment Plants
- Sewage Treatment Plants
- Below-Grade Foundations
- Elevator Pits
- Bridges
- Dams
- Marine Cargo Ports & Docks
- Parking Structures & Lots
- Tunnels

Whatever your needs...
we have the solution.
